

# Deep Dive - Terraform

---

## SETTING THE STAGE

**Ned Bellavance**

MICROSOFT MVP, CLOUD AND DATACENTER MANAGEMENT

@ned1313 [www.nedinthecloud.com](http://www.nedinthecloud.com)

# Are You Ready?

**Terraform command line**

**Variables and values**

**Providers and provisioners**

**Resources and modules**

# Additional Technologies

**Amazon Web Services**

**Docker for Windows**

**Jenkins for CI/CD pipeline**

**Ansible for configuration  
management**

GLOBOMANTICS

Success is rewarded with more work

No admin is an island

Integrate with development

Automate all the things

# Course Content

- Import existing resources
- Remote state and workspaces
- Custom data sources and templates
- CI/CD pipeline integration
- Using configuration managers

# Summary

Are you ready for the challenge?

Prepare your environment

Things are going to get DevOps

Take Terraform to the next level
