Installing Code Dependencies and Managing Builders

Kyler Middleton

NETWORK AND DEVOPS ARCHITECT

@kymidd   www.kylermiddleton.com

Overview

Types of builders

Managing modules and code tools

Types of Builders

Can We Build It? Yes We Can!

Cloud-hosted

CI/CD hosted, outside our network

Virtual machine

Servers we manage ourselves, need to patch and maintain

Golden image

Spun up when needed off point-in-time snapshot

Docker

Dynamic way of building servers on demand to specification

Managing Modules and Code Tools

To Download or Not to Download

Public Repo

Pull tools directly from vendor public repos

Self-hosted

Download once, store locally

Built-in

Bake images into builder image
